

THE BRADY BIKE

Photos By: Juan Gandara

This bagger is one top notch build. My Pal Juan up in Lubbock built it. Juan has a style of building that I really dig, he puts a lot of his heritage into the build and as others this one really hit the mark. It was built once and shown; however the owner wanted more so this version is being seen by you the readers of the Clubhouse magazine first. This builder really knows how to look into the build and see the potential of what he adds to it.

With the flow of the bikes design, slammed to the ground and suicide shifter it really takes it one step further. The color and graphics add to the whole picture, it is defiantly a bike you can't see and not want to look closer. The LED screen and sound system are just a plus for this looker. There is a year into this bike and there are plans to take it further I can't wait to see it.

The first time out of the shoot it was taken to Rick Fairless's Bike Show in Dallas and took 1st place in Radical Bagger, that's a BIG win at Rick's show as there were some sick baggers there but only second place ones. Then they rolled it into ROT's bike show and BAM 1st place bagger another win. It's this kind of builder that ads hope to the future of bike building, he has a fresh style that everyone digs and he puts his heart into the build so not only is this bagger hot looking but it represents the fact that there are still builders that devote themselves to their work. I can tell you I know for a fact Juan does a lot of the work himself and goes late into the nights building people's dreams. Good job again Juan. **CM**

Owner - Brady Dowell
Shop Name - Lubbock Custom Motorcycles
Year/Make/Model - 01/H-D/FLHTCUI
Fabrication - LCM
Assembly - LCM
Engine - Year/Type/Size - 01/H-D/95ci
